Lubrication Systems for Agricultural Machinery

Interlube Systems Ltd - maximising industrial performance world-wide. . .

AC Lubrication Systems for Agriculture

AC Electrically Operated multi-line Lubrication Systems

The Interlube lubrication system is compact, easy to operate and virtually maintenance free except for reservoir refill.

The multi-line concept enables each bearing to be lubricated independently (applications above)

The lubrication system is fully adjustable and will deliver precise lubrication at pre determined times.

System Benefits

- Prolonged bearing life
- Lubricates whilst the Machine operates
- Reduced lubricant consumption, uses lubricants more efficiently
- Prevents manual lubrication and health and safety issues
- Less down time

Features

- Electrically operated 12/24volts DC
- Suitable for use with NLGI grade 2 Grease and Oil
- Multi position timer with memory
- Six colour coded pumping units available with outputs from 0.01cc to 0.1cc
- Manual override facility as standard on all models
- High quality, reliable product. Made in the UK.

HDI Lubrication Systems for Agriculture

HDI electrically operated progressive lubrication system

Expensive agricultural machinery must be properly maintained, harsh natural environments cause continual damage and operators know it is wise to protect their investment with a well fitted lubrication system. The HDI system is a well designed British built product ideally suited to such rugged applications providing lubrication to bearings and linkages whilst the machine is in use. This has always been shown to be the most efficient way to lubricate also providing the most efficient use of lubricants.

Recent Fitments

- Claas Rollant - Balers
- Quivogne Tine Master Disc Harrow
- Claas Jaguar 850 - Forage Harvester
- JCB Backhoe Excavator
- Doosan DL300/400 - Loading shovels
- Stronga HookLoada
- Berthoud Self Propelled Sprayers
- G T. Bunning - Muck Spreader

LX Battery Operated Grease Gun

Heavy Duty, Deluxe Grease Gun

The LX Battery Operated Grease Gun provides more features for professionals who demand a better quality gun for heavy duty use in demanding industries such as agricultural, quarrying/mining.

The LX design is unique making manual lubrication simple and the gun easy to carry

Superluber kit comprising of:

12V DC Grease gun suitable for bulk fill or cartridge, case, strap, two batteries and 220-240V battery charger.

LOW COST LUBRICATION KITS

Automatic Lubrication Kits
Automatically Lubricates up to 6 chains/gears.

This is a low cost, compact system which has been used successfully for many years. The kits detailed include all the equipment required to feed automatically up to six application points. The pump will operate at pre-set time intervals feeding flow units which are calibrated to proportion oil to a specific point.

Kit comprises of:

- 1 x submersible 6 cycle pump
- 1 x flow unit manifold
- 6 x flow units and blanks
- 6 x brushes
- 10m Amax O.D nylon tube
- 2m x Amax O.D steel tube (1m length)
- 6 x Anchor blocks
- Amax/Kamin O.D compression fittings
- Clips + self tapping screws

Kit No.	Cycle Time	Voltage
LIN 1821	60min	110/240
LIN 1822	30min	110/240
LIN 1823	5min	24V DC
